Shin Yat Tong On Yat Kindergarten

學年

2024-2025

年級

K3

## 活動名稱

Food for Good - Campus Initiative: 1. Effective use of food waste disposers workshop 2. Visit to the Yau Tong Community Kitchen

## 活動目標

- Learn how to properly dispose of food waste using a food waste disposer
- children learn how to reduce food waste by recycling food containers and making the most of resources.
- To cultivate young children's appreciation for the importance of food and their sense of responsibility to participate in environmental protection.

## 活動簡介

Through presentations and videos, young children learned how to properly handle food waste using a food waste disposer to reduce resource waste and environmental damage. The children were fully engaged in the activity, understanding that not all food waste can be recycled and ground into organic fertilizer. For example, large bones or hard objects are not suitable for recycling, while eggshells and fruit peels are. Dan, the older brother, guided the children to add organic fertilizer to the soil, experiencing the joy of learning and emphasizing that cherishing food and reducing food waste is paramount.
