2024-2025

K1

活動名稱

K1 Visit the Lions Nature Education Centre

活動目標

- Understanding the characteristics of spring weather
- Children can explore the shape and growth pattern of crops through their senses and learn their names, thus fostering good eating habits.
- Cultivating children's attitude of loving nature and cherishing food

活動簡介

K1 children and their parents visited the Lions Nature Education Centre farm. They observed fresh lettuce and broccoli being grown, and even discovered purple tomatoes. The children also witnessed farmers cultivating and harvesting the crops. The children also visited different exhibits: an agriculture exhibit, a fishing exhibit, and an insect exhibit. All three exhibits used advanced, innovative, and diverse exhibits and interactive games to help the children learn. This learning experience not only taught them about crops but also allowed them to connect closely with nature, reaping countless surprises and joy!
