K3

活動名稱

Visit MTR Corporation Limited Station Rail Voyage

活動目標

- Learn about the story of railway development
- Get to know different railway branch lines
- Children should follow the rules when visit .

活動簡介

Our kindergarten led the children on an experiential learning activity to visit the "Station Rail Voyage" railway exhibition in Hung Hom. The "Station Rail Voyage" railway exhibition allows children to travel through the past and present of Hong Kong's railways. In addition to learning about the stories of the railway's development, recognizing different railway station names and lights, they can also personally ride on the old yellow-headed and fly-fly-like trains that used to carry Hong Kong people. This one-stop journey allows children to travel through the past and present of the railways, decipher its mysteries, and learn about the railway services that have always been with us. It is truly an eye-opening experience.
