K3

活動名稱

K3 Visit Sau Mau Ping Road Safety Town

活動目標

- Familiarize yourself with road crossing facilities and precautions when crossing the street.
- children can communicate, cooperate, and solve problems with others.
- Cultivating children's awareness of their own safety

活動簡介

Police officers from the Road Safety Unit of the East Kowloon Traffic Department of the Hong Kong Police Force explained four types of pedestrian crossing facilities to young children through a briefing: zebra crossings, pedestrian bridges, pedestrian tunnels, and pedestrian traffic lights. They also taught the children the basic rules for crossing the road (stop, look around, cross). After learning the knowledge, the children practiced crossing the road correctly by role-playing as pedestrians using real facilities within the city, thereby improving their awareness of road safety. This experiential activity not only allowed children to learn about the functions of pedestrian crossing facilities and how to cross the road correctly, improving their road safety and self-protection awareness, but also allowed them to experience the fun of simulated driving.
