2023-2024

K2 and K3

活動名稱

K2 and K3 Visit the Lions Nature Education Centre

活動目標

- broaden young children's understanding of "food" and "nature".
- Able to observe and record the name, type, appearance, and growth morphology of crops.
- To cultivate in young children gratitude for the hard work of farmers and respect for their expertise and skills in farming.

活動簡介

To coincide with the school's "Healthy Living Month," teachers led the children on a visit to the Lions Club Nature Education Centre. The centre features exhibits in various locations, including an insectarium, a shellarium, a fishing museum, a farmhouse, and a geopark visitor center. Teachers guided the children through the different exhibits and farmland, helping them learn how farmers cultivate various fruits and vegetables.
