

# Kindergarten Education Scheme

## School-based Learning Activity of outdoor experiential learning

### Display Form

**Shin Yat Tong Yat Tung Kindergarten**

Name of School

**2024-2025**

School Year

**K3**

Grade Level

### Name of Activity

**Visiting Lions Nature Education Centre**

### Objective(s)

- Through appreciating plants and exploration, learn the names of different plants and fruits.
- Understand the importance of staying quiet and caring for small insects in a natural environment.
- Use your senses to experience the beauty of nature.

### Brief Descriptions:

Our center took the children to visit the Lions Club Nature Education Center, where they observed various exhibits such as the Fish Pavilion, Shell Pavilion, Agriculture Pavilion, and Insect Pavilion. Additionally, in the fields, the children saw special crops like longan, lemon, lemongrass, water lilies, and emperor beans. This activity can foster a love for nature.

### Record of Activity (E.g. Children's Work / Photos / Videos of the activity)
